

Consumer Goods SMB

Information Protection MVP for sellers, architects, and technical specialists

Customer & product data

Protect support exports, customer lists, and payment-adjacent data at scale

Packaged offer

Repeatable quick start with a clear customer-data story

Built-in ready

Customer names, email, phone, address, payment card data covered by built-in SITs

HOW TO READ THE EXAMPLES

The boxes below show common privacy, payment, product safety, and records requirements in Consumer Goods.

FOOD & BEVERAGE

Recipes, allergen data, FDA recall files, retailer joint business plans

HEALTH & BEAUTY

Quality docs, formulations, safety data, direct-to-consumer customer lists

APPAREL / SOFTLINES

Supplier codes, design specs, pricing grids, season plans

CONSUMER ELECTRONICS

Product specs, warranty data, returns, firmware files

HOUSEHOLD & CPG

SDS sheets, trade promo plans, co-manufacturer specs

Why it matters for Consumer Goods SMBs

Customer records, pricing and promotion plans, launch materials, manufacturing partner specifications, and recall files move through Exchange, SharePoint, and OneDrive every day — often across distributors, brokers, agencies, retailers, and suppliers.

This MVP helps teams protect high-value business data in Microsoft 365 within 30 days while keeping day-to-day collaboration moving with trusted external partners.

Partner service motion (30–90 day path)

- ① On demand learning — [Implement Microsoft Purview Information Protection \(Microsoft Learn\)](#)
- ② Deploy Labels— pilot on Exchange, SharePoint, OneDrive · Pilot (Partner-led) · 2–4 weeks
- ③ Govern sharing — trusted external controls · Expansion (Partner-led) · 4–6 weeks
- ④ Managed service — tuning, data loss prevention, audit evidence · Ongoing (Partner-led)

LICENSING: BUSINESS PREMIUM + PURVIEW SUITE ADD-ON

Included in Business Premium (MVP)

- ✓ Manual + default sensitivity labels
- ✓ Built-in sensitive information types
- ✓ Data loss prevention for Exchange, SharePoint, and OneDrive
- ✓ Basic audit (180-day retention)
- ✓ Controlled external sharing

Purview Suite for Business Premium (Phase 2)

- ✓ Auto-labeling policies based on content and context
- ✓ Custom sensitive information types, exact data match, trainable classifiers
- ✓ Advanced data loss prevention for endpoints, Teams, and browsers
- ✓ Audit (Premium) (1-year retention, search)
- ✓ Insider Risk Management and Records Management
- ✓ Data Lifecycle Management
- ✓ Information Barriers
- ✓ Communication Compliance

RECOMMENDED FIRST CUSTOMER MOTION — 30-DAY MVP

1 DISCOVER (WEEK 1)

Map customer-data exports, joint business plan and trade-plan locations, manufacturing partner and agency sharing, and HR hot spots. 60-minute discovery workshop.

2 DEPLOY (WEEKS 2–3)

Publish the 5-label model. Pilot on Exchange, SharePoint, and OneDrive. Turn on built-in detection, default labels, and controlled external sharing for partners.

3 PROVE (WEEK 4)

Create an evidence pack showing labeled content, remediated risky sharing, and encrypted HR and recall files. Prepare Phase 2 options such as endpoint coverage, broader data loss prevention, and custom loyalty or order identifiers if needed.

EXPECTED OUTCOMES — 30 / 60 / 90 DAY CHECKPOINTS

30 days FOUNDATION (MICROSOFT-DELIVERED ASSETS)

- ✓ 5-label model live on Exchange, SharePoint, and OneDrive
- ✓ Built-in detection covering customer data in exports
- ✓ Default labels applied to new content
- ✓ HR/payroll files encrypted with Highly Confidential

60 days CONTROLLED SHARING (Partner service opportunity)

- ✓ External sharing policies for distributors, brokers, and agencies
- ✓ Recall and safety files under watermarking and encryption
- ✓ Manufacturing partner specs on auto-expire links
- ✓ Alerts on customer-data exports leaving the organization

90 days EXPAND (Partner service opportunity)

- ✓ Audit evidence pack for GDPR and PCI readiness reviews
- ✓ Custom detection for loyalty or order IDs if the data model needs it
- ✓ Endpoint labeling for field sales and remote teams
- ✓ Decision point on Purview Suite for Business Premium for more automation and governance

Talk track for sellers, architects & specialists “Consumer Goods SMBs need practical protection for customer data, pricing, and launch materials while still working with distributors, brokers, retailers, and agencies. Purview lets them start with built-in detection and controlled external sharing now, then add custom loyalty or order identifiers only if the data model requires it.”	Discovery questions (Consumer Goods) • Where do customer records live — CRM, direct-to-consumer sites, loyalty, warranty, or support systems? • Which retailers, distributors, brokers, or agencies collaborate on joint business plans, pricing, or launch plans? • Do you share bills of materials, formulations, or artwork with co-manufacturers or logistics partners? • Are there loyalty, order, product, or membership IDs that built-in detection will not catch? • Who owns recall, safety, or HR files — and where are they stored?	Handle common objections “We’re too small for this.” Business Premium already supports a practical 30-day starting point with built-in detection and labeling. “NDAs already cover us.” NDAs do not stop accidental forwards or overshared links — controlled sharing does. “Will this slow my users?” Default labels and built-in detection keep the pilot lightweight for end users. Recommended next step Run a 60-minute workshop to identify high-value data, external-sharing workflows, and the scope for a 30-day pilot.

TOP DATA TYPES, LABEL FIT, AND EXAMPLE CUSTOMER MOTION

Workflow or Content	High-Value Data (Built-in / Label-Led / Custom)	Starting Label	MVP Guidance
Customer service, warranty & returns	Built-in: Customer names, email, phone, address, payment card-related data	CONFIDENTIAL \ ALL EMPLOYEES	Start with built-in Microsoft detection; protect customer records first.
Distributor, broker, retailer & agency collaboration	Label-led: Customer lists, joint business plans, retailer scorecards, launch packs, category plans	CONFIDENTIAL \ SPECIFIC PEOPLE	Controlled external sharing for trusted partner workflows; block unmanaged forwards.
Payroll, HR, complaint & incident files	Built-in: Tax IDs, bank details, salary data, employee case information	HIGHLY CONFIDENTIAL \ ALL EMPLOYEES	Strong early proof point for encryption and tighter access control.
Trade promotion, pricing, margin & launch plans	Label-led: Annual joint business plans, trade-spend calendars, pack artwork, pre-launch decks	CONFIDENTIAL \ ALL EMPLOYEES	Start with content labeling and default labels, then add contextual rules later if needed.
Recall, safety & regulatory filings	Built-in: FDA/CPSC recall packs, allergen data, SDS sheets, regulator responses	HIGHLY CONFIDENTIAL \ ALL EMPLOYEES	Apply encryption and watermarking, with tightly scoped permissions for legal, quality, and regulatory teams.
Manufacturing partner, logistics & supplier specs	Label-led: Bills of materials, formulations, sourcing specs, forecasts, supplier contracts	CONFIDENTIAL \ SPECIFIC PEOPLE	Controlled external sharing with trusted externals; auto-expiring links.
Approved campaigns & public product collateral	Published marketing content, approved influencer assets, public case studies	PUBLIC	Keep external-ready content easy to share and clearly separated.
Internal operations & team coordination	Label-led: Meeting notes, internal project briefs, team SOPs, non-sensitive supplier comms	GENERAL	Apply as the default email label; keep routine internal content lightly marked and easy to find.
ERP-integrated pricing, order & fulfilment workflows	Label-led: ERP pricing feeds, order management exports, add-in-driven reports where encryption causes downstream breakage	CONFIDENTIAL \ INTERNAL EXCEPTION	Use only when encryption blocks a critical LOB workflow; document the exception and review quarterly.
Quality management & compliance tooling workflows	Label-led: QMS-integrated records, regulatory-reporting feeds, or safety-system exports where HC encryption breaks critical tooling	HIGHLY CONFIDENTIAL \ INTERNAL EXCEPTION	Exception path only; marking without encryption. Requires IT sign-off and quarterly justification review.
Phase 2 expansion	Custom if needed: Loyalty IDs, order IDs, membership IDs, promo identifiers	HIGHLY CONFIDENTIAL \ SPECIFIC PEOPLE	Add custom detection or exact data match only if the customer data model requires it.

RECOMMENDED 8-LABEL DEFEND-ALIGNED MODEL FOR CONSUMER GOODS SMB

Label	Consumer Goods Example Content	Protection Baseline
PUBLIC	Approved campaigns, published case studies, external marketing collateral	No encryption; external sharing allowed
GENERAL	Internal SOPs, routine partner coordination, low-risk operating docs	No encryption; internal marking only. Default email label.
CONFIDENTIAL \ ALL EMPLOYEES	Customer exports, proposals, joint business plans, trade-spend calendars, pricing, launch decks	Marking + encryption; no external sharing. Default document label.
CONFIDENTIAL \ SPECIFIC PEOPLE	Distributor contracts, broker packs, manufacturing partner specs, auditor diligence, agency briefs	Named-user permissions for trusted externals; governed external sharing required.
CONFIDENTIAL \ INTERNAL EXCEPTION	LOB or legacy workflows where encryption breaks add-ins, ERP integrations, or partner portals	Marking only; no external sharing. Exception path; requires justification.
HIGHLY CONFIDENTIAL \ ALL EMPLOYEES	Payroll, incident files, recall packs, regulator responses, SDS sheets, formulations, trade secrets	Strong encryption, watermark, block unmanaged sharing; no external access.
HIGHLY CONFIDENTIAL \ SPECIFIC PEOPLE	Regulator responses, legal holds, auditor diligence packs requiring trusted external access	Explicit named-user access only; auto-labeling via SITs recommended.
HIGHLY CONFIDENTIAL \ INTERNAL EXCEPTION	Critical workflows where HC encryption breaks safety or compliance tooling	Marking only; no external sharing. Tightly controlled exception path.
