

MICROSOFT PURVIEW · PARTNER ASSET DEEP-DIVE

SMB Information Protection

Inside the 5 partner assets

What's in each asset · How it works · How partners use it

Launch: May 18

What we want to achieve?

Goal – Drive awareness of the assets we will be making available to partners:

- Easier to find product and license information
- Identify potential services to offer to customers
- Minimum viable Security settings for your customers

What we want to achieve?

- Preview of what will be available starting May 18
- Get feedback, help to shape the design and plans

What will we cover today?

1. Overview of assets (starting with MIP)
2. Demo
3. Q&A

Guided Labeling Assistant

Browser-based decision tool for defining Purview sensitivity labels.

WHAT'S INSIDE

Secure by Default label set

- Public · General · 3× Confidential · 3× Highly Confidential
- Industry-aware: Healthcare, Finance, Legal, Retail, +
- HIPAA / PCI-DSS / GDPR overlays

HOW IT WORKS

6-step flow

- Set context — industry, data, regs
- Walk yes/no decision tree
- Review label + rationale
- Check exceptions & examples

OUTPUTS

PDF · CSV

- PDF for stakeholder review
- CSV for GRC / compliance tools
- Runs locally — no data leaves browser

Audience: SMB owners, IT decision-makers, partner consultants scoping a labeling effort.

How partners use it: Open in browser → walk the decision tree with the customer → export PDF/CSV → hand off to deployment.

Where it lives: <https://aka.ms/MIP-Labeling-Assistant>

PowerShell Deployment Script

GitHub-hosted automation that turns a label plan into a configured tenant.

WHAT'S INSIDE

Secure by Default label set

- Configures the 8-label model in Purview
- Pairs with the Labeling Assistant CSV
- Repeatable across customer tenants

HOW IT WORKS

Inspect, then run

- Ships with WhatIf mode by default
- Reviewable script — no opaque binaries
- Test in non-prod tenant first
- Validated by Purview product team

DISTRIBUTION

Open-source repo

- Public GitHub repository
- Versioned, issues, PRs
- Partner site links out — no script copy on the partner site

Audience: Partner IT admins and Microsoft consultants deploying Purview labels in customer tenants.

How partners use it: Pull the latest from GitHub → run with -WhatIf → review changes → apply to tenant.

Where it lives: <https://aka.ms/Deploy-Scripts>

5 Industry One-Pagers

DEFEND-aligned guidance tailored to each vertical's regulatory environment.

Healthcare

HIPAA / HITECH

Financial Services & Insurance

PCI-DSS / SOX / GLBA

Manufacturing & Distribution

IP / supply chain

Consumer Goods

Brand / PII

Professional Services

Client confidence

What's on each one-pager

TAM data · Recommended 8-label model · Example content per label · Regulatory considerations · Partner deliverables checklist

How partners use it: vertical-specific opener — partner walks into the customer with a brief tailored to their industry.

Where they live: SharePoint — CCP / NPF Artifacts / Final One-Pagers (PDF + editable)

MIP SOW Generator

Web tool that produces a customer-ready Statement of Work in minutes.

WHAT'S INSIDE

Form → SOW

- Guided input form for partner
- Generates structured, branded SOW
- Customizable per deployment

COVERAGE

Foundation → Premium

- Sensitivity labels & policies
- DLP, encryption, watermarking
- Incident response support tiers
- Aligned with PSA SOW templates

OUTPUT

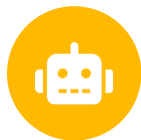

Customer-ready doc

- Scope, deliverables, timeline
- Roles & responsibilities
- Pricing placeholders
- Standardizes across partners

Audience: Partner sellers and account managers scoping Purview engagements with SMB customers.

How partners use it: Fill the form with customer-specific scope → generate the SOW → tweak pricing → send to customer.

Where it lives: <https://aka.ms/SOW-Generator>

Quick Guide to GitHub Copilot CLI

Partner reference for using Copilot CLI as an AI assistant on M365 questions.

WHAT'S INSIDE

Setup + prompts

- Setup walk-through
- Suggested prompts for MIP / Purview
- SKU & add-on path matrix
- Going-deeper examples

FORMAT

PDF document

- Single PDF reference guide
- Direct download — no companion deck
- Live examples partners can try same-day

WHY GENERIC

Beyond MIP

- Cross-M365 AI reference
- Useful across security & compliance motions
- Reusable as partners pivot to other workloads

Audience: All SMB partners — sellers, architects, technical specialists working M365 motions.

How partners use it: Reference guide partners keep open during customer calls — answer licensing & compliance questions at AI speed.

Where it lives: SharePoint — Quick-Guide-Copilot-CLI-v2 (PDF only)

Five Assets, Five Jobs

- 1 **DECIDE** Guided Labeling Assistant · browser, no data leaves
- 2 **DEPLOY** PowerShell Script · GitHub, WhatIf, repeatable
- 3 **POSITION** Industry One-Pagers · 5 verticals, quick 10k foot view
- 4 **SELL** MIP SOW Generator · web form → SOW in minutes
- 5 **ENABLE** Copilot CLI Quick Guide · PDF, research and discovery assistant

All five are live on · **Launch: May 18 (Locations may vary)**
